### Trip Overview

An Upper Mustang Bike Trip is an adventurous journey through Nepal's culturally rich region, known as the "Forbidden Kingdom." The region, located in the rain shadow of the Himalayas, offers a dry and arid landscape with unique geological formations and desert-like scenery. To visit, travelers need a special permit, an Annapurna Conservation Area Permit, and a Trekkers' Information Management System (TIMS) card. The best time to visit is during the spring and autumn, with mountain biking rentals in Kathmandu or Pokhara. Responsible tourism, respecting local customs, and minimizing environmental impact is essential. Mustang, formerly known as the Kingdom of Lo, is a remote and isolated region in the Nepalese Himalayas. It is one of the world's most preserved regions, with a majority of the population still speaking traditional Tibetan culture. The Upper Mustang Bike Trip is popular in the region, which is home to the Thakali people, who speak the Thakali language and combine Tibetan and Nepali elements.

The region is 53 km long and 60 km wide, with a range of 2,750 m to 6,700 m. The Annapurna Conservation Area offers stunning mountain views and challenging trails for endurance sports, core strength, and self-reliance. This Upper Mustang Biking Tour offers the best biking experience in Nepal, with great trails and challenging terrain.
